

As VA facilities prepare budgets for next year, Picis is offering ways to enhance your existing infrastructure to help provide a high level of quality care for our US Veterans

OR Manager

Picis OR Manager is a comprehensive operating room management solution that automates each step of the perioperative process and provides the important data needed to analyze and identify ways to reduce costs, maximize resources, and help clinicians provide quality of care.

GSA PRICING:

NUMBER OF BEDS	OR MANAGER ESSENTIALS	OR MANAGER ADVANCED
1	\$66,055	\$74,241
2-30	\$12,352	\$12,352
31+	\$11,298	\$11,298

SmarTrack

Designed to assist clinicians in preparing, planning, and optimizing resource allocation with a big picture view of where patients are in their perioperative journey. Coupled with the ability to dive into the detailed records of individuals, SmarTrack will help keep staff informed with appropriate notifications and messages while your dynamically generated record makes audit trails a breeze.

GSA PRICING:

NUMBER OF BEDS	SMARTRACK
1	\$21,220
2-30	\$1,572
31+	\$819

Waveforms

A complementary module that runs with 8.6 MR3 or MR4 and helps to eliminate paper from medical devices and consolidate documentation electronically. Compatible with Philips and accepts 5 leads, including EKG, PAA, BIZ, EEG. (GE driver is coming soon!)

While the list price is \$135,000 per facility and the GSA price is \$100,000/facility, we are now offering the early adopter pricing for a limited time. Once Waveforms is live with the early adopter VA customers, there will be less discounting available this calendar year. **Early adopter pricing is as follows:**

\$9,999

One-time license and implementation price per facility.

Yes, simply a credit card swipe!

ANNUAL MAINTENANCE:

\$20,000

on VEMA/National BPA (calculated into existing maintenance already contracted for, with option years; maintenance due upon signing)

Envision

Plug into your HIS system and get data you can act on from reports that write themselves. A powerful analytics tool to help you gain insight from macro trends and patterns at a glance, then dive in to review, process, and share granular metrics. From department performance to patient case costing, interact with the metrics you need to improve your practices on any screen, including tablets and mobile devices.

Quoting is based on Picis Modules owned by the facility, priced per facility, and offered as a 3 year term. Implementation is on-premise. There is no volume discount in the pricelist, though discounting may be considered on an opportunity basis.

Envision for OR Manager/Envision for Anesthesia Manager/Envision for Critical Care Manager:
